[Github](#) | [Portfolio](#) | [LinkedIn](#) | [Blog](#)

Full Stack Developer

Highly self motivated, detail oriented, and newly certified full stack software engineer with enthusiasm for building intuitive user interfaces seamlessly integrated with backend services. Able to independently write high-quality, performance driven code on well-scoped tasks and seek guidance as needed. Team player focused on delivering business value for customers and creating a flow of value into production through ongoing experimentation and iteration. Strongly committed to sharing knowledge, learning new skills, growth, and becoming a high-performing, impactful developer.

SKILLS

React | SQL | noSQL | JavaScript | Ruby on Rails | Redux | Git | HTML | CSS | SASS | Photoshop | Illustrator | NodeJS | MongoDB | Express | Mongoose | Firebase | REST API | Webpack

PROJECTS

Archivo del Santo - [Github](#) | [Live Site](#)

A MERN stack streaming platform for the films of Luchador El Santo

- Crafted an elegant frontend using React Hooks to easily manage components and state
- Implemented styled components architecture and advanced CSS/SASS techniques including mixins, variables, and animations
- Followed industry standards to ensure website has a responsive design and is scalable

StoriTale - [Frontend](#) | [Backend](#) | [Demo Video](#)

A story sharing platform built with a React - Redux frontend and Rails API backend

- Created a Rails JSON API with Postgresql and robust resources and polymorphic relationships
- Designed a responsive application using Material UI components as well as custom CSS
- Crafted a platform to share interesting stories with followers

CountryCombr - [Github](#) | [Live Site](#) | [Figma](#)

A simple country data visualization application made with React, Next.js, and responsive CSS

- Wireframed a custom UX/UI utilizing Figma to create a mobile web first responsive design
- Worked off of the wireframe to produce high quality, clean, reusable code
- Utilized Next.js SSG to provide better SEO results

EXPERIENCE

Helpful Engineering

Remote

Front End Engineer

01/2021 - Current

- Translated visual and written designs into efficient front-end components
- Worked on a cross-functional team to ensure the integrity and feasibility of the UI throughout the design and development lifecycle.
- Built reusable code and optimized components for maximum performance across a vast array of web-capable devices and browsers

Hyde Park Bar & Grill

Austin, Texas

Bartender

03/2018 - 03/2020

- Gained multitasking skills and maintained focus under a fast paced environment
- Prioritized and ensured customer satisfaction through proper execution and presentation of individualized orders

Big Frog

Austin, Texas

Graphic Designer

06/2016 - 03/2018

- Utilized Adobe Photoshop, Adobe Creative Suite, and market research to create customized orders efficiently while staying true to the vision of the client.
